-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 26 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Olivier et al (newly cited). Olivier et al disclose the claimed structure including a pole with a shaft 145 having a portion that is rotatable about the longitudinal axis of the shaft, a two rope receiving portion 20 connected to the shaft via 110, 120, and a sensor 240, the sensor being positioned to sense rotation of the rotatable portion of the shaft. Note that the intended use for a watercraft has been given limited weight as intended use defines no patentable structure. Additionally, the device is capable of being towed by a watercraft.

3. Claims 14 and 15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hayes (newly cited). Hayes discloses a method for compensating for a pulling force being exerted on a pole (at 16) mounted on a watercraft 10, sensing a pulling force exerted on the watercraft, sensing a direction of the pulling force and altering at least one performance parameter of the watercraft based on the sensed force and the direction of the pulling force (note column 2, lines 50-60, for example).

4. Claims 1-13, 21-24, and 27-34 are allowed.

5. Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwata et al show a sensor.
7. Applicant's response has been considered a request for reconsideration of the finality of the rejection of the last Office action and is persuasive and, therefore, the finality of that action is withdrawn.
8. Applicant's arguments with respect to claims 14, 15, and 26 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Avila whose telephone number is 571-272-6678. The examiner can normally be reached on Monday to Thursday from 7 AM to 3 PM (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel J. Morano can be reached on 571-272-6684. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
